

A guide to online platforms used at Sedgehill Academy

This booklet is a guide for families and students to the different online platforms used at Sedgehill Academy.

Online platforms are useful additions to traditional home learning tasks such as reading or extended writing and have many benefits for both students and teachers.

For students, online homework tasks provide instant feedback about how well they are learning and means that students can work at their own pace through material. Sometimes work will be set to help students prepare for a new topic, and sometimes to recap and review their learning from lessons. Revisiting material in this way means that students are developing their long-term memories and building secure knowledge in their subjects.

Online platforms allow teachers to set work for specific groups of students or even individual students depending on their needs and allow quick and accurate collection of data about how well individuals and groups of students are learning. Because online platforms reduce marking, teachers can use the extra time and the data about student learning to inform their planning and teaching.

We hope you find this booklet helpful.

Contents:

1. Sparx/Hegarty/Dr Frost (Maths)
2. Bedrock (English)
3. Seneca Learning (Science, History, Geography)
4. Memrise (French/Spanish)
5. Kinteract (Music)
